

General information

Polyexpim FZE is a production company strategically focused on a full range of design, manufacture, supply, installation and commissioning services for the fuel and energy complex of GCC countries and CIS.

Production facilities are located in the city of Umm Al Quwain, UAE, on a territory of UAQ free trade zone with a total area of more than 1,300 m², including indoor production workshops, equipped with all necessary equipment, including lifting capacity up to 20 tons, for the manufacture of high-quality products within the deadlines established by the agreements.

The company's priority activity is the implementation of projects of technologically-advanced products competing on equal terms with imported analogues.

Polyexpim FZE manufactures and supplies high-tech equipment:

- Valve units for the arrangement of gas and gas condensate wells;
- Pumping units for pumping liquids;
- Filtration units for cleaning liquids and gas;
- Oil and water treating plants ;
- Associated equipment (oil and gas expanders, mixers, end closures);
- Block-modular installations for various purposes;
- Units for the preparation, refining and disposal of oil, natural and associated petroleum gas;
- Metering stations for thermal energy, water, oil and gas;
- Flare equipment;
- Mobile units for the preparation and shipment of oil;
- Blocks technological water heating;
- Prefabricated modular and mobile buildings;
- Metal piles and tips;
- Technological valve units.

Polyexpim FZE successfully implements projects within the framework of the development of the largest fields in the worldwide and joint projects with companies from the GCC countries and abroad.

An integral component of the company is to ensure and comply with the requirements of labor protection, industrial safety and environmental protection.

All activities of the enterprise are carried out in accordance with the current legislation of the CIS and international standards. Polyexpim FZE has a license to carry out installation, maintenance and repair of fire safety facilities for buildings and structures; admission of SRO 2 (second) level of responsibility allowing construction, reconstruction, overhaul of capital construction facilities. Polyexpim FZE has certificates of conformity the integrated management system to the requirements ISO 14001: 2004, ISO 9001: 2015 and OHSAS 18001: 2007.

Polyexpim FZE has successful experience working with the largest oil and gas companies, as well as with the largest state company from Kazakhstan: JSC “NC KazMunayGas”.

In the conditions of a dynamic competitive environment, Polyexpim FZE pays great attention to the search for new technological and design solutions. Close cooperation with enterprises by direct representatives of GCC and foreign manufacturers makes it possible to determine and pursue a flexible pricing policy to promote high-tech and high-quality equipment.

In 2017, Polyexpim FZE launched the production of end closures for cleaning and diagnostics of the linear part of main oil pipelines with nominal passages from 150 to 700 mm inclusive and with a nominal pressure of up to 16 MPa.

Polyexpim FZE is ready to offer you services in the manufacture of conical and helical welded tips for steel tubular piles. The use of finished tips allows you to reduce transportation costs and speed up the installation process in the field conditions.
